

The 5th Annual Canadian Arthritis Research Conference

April 3-4, 2024

Canadian Arthritis Research Conference 2024

Advancing Arthritis Research: Team Science for Greater Impact

Conference Overview

Target Audience:

The primary target audience for the Canadian Arthritis Research Conference includes arthritis researchers, scientists, independent investigators, rheumatologists, residents, and trainees.

The secondary target audience includes knowledge users involved in the fields of arthritis and rheumatic diseases, knowledge translation experts, health care professionals, and those with lived experience of arthritis.

Learning Objectives:

At the end of the conference, participants will have had the opportunity to:

1. Convene with clinicians, scientists, trainees, patients, and stakeholders nationally and internationally in the broad field of arthritis.
2. Discuss advances in basic science, clinical science, and understanding of the social determinants of health in the field of arthritis research.
3. Describe the value of patient and public involvement and virtual arthritis care in Canadian efforts to improve the health of people living with arthritis.
